Meet Cabolo!

The smartest, fastest, safest, and most ingenious way to record, transcribe, and translate any meeting

Transcribing, sharing, and retrieving reports, interviews, minutes of meetings, board of directors, assemblies, lectures or council meetings is a process that has a significant impact on productivity, both in terms of cost and time.

CABOLO® is an Artificial Intelligence device that records, transcribes, translates, and archives in real-time.

Designed to ensure maximum data protection, it does not require any internet connection, ensuring confidentiality and utmost security.

CABOLO® recognises speech in over 24 different languages and also it can automatically translate into over 60 languages.

From words to Cabolo!

CABOLO® is a product designed by CEDAT85, an innovative company and market leader in the development and implementation of the most advanced artificial intelligence and voice recognition technology solutions

With over 35 years of experience, CEDAT85, using the latest methodologies based on Deep Neural Networks and Machine Learning, has been profiled in Gartner's reports for:

- Vendor ID Toolkit for NLT
- Hype Cycle for Natural Language Technologies
- Hype Cycle for Frontline Worker Technologies
- Market Guide for Speech to Text solutions
- Competitive Landscape

Cabolo is more than you think!

interview kit

Artificial intelligence at the service of law enforcement

The CABOLO® interview kit is the voice transcription solution for all conversations that require to be recorded reliably and with confidentiality.

The kit, consisting of 2 to 20 wireless microphones, enables dependable and

nominal voice identification of each speaker. Audio recording and automatic transcription are synchronised and indexed.

The stand-alone device does not require any internet connection and offers maximum data security.

Reliable and secure, the interview kit is the optimal portable solution for interviews, interrogations, and court hearings.

conference system

An all-in-one audio, video, and text solution

Designed for local authorities for plenary sessions, hybrid and in-person, CABOLO® is a recording, transcription, translation, and automatic subtitling solution that is integrated with main conference systems.

This technology covers all situations where speakers are sitting distantly or not present in the same room.

In addition to recording, transcribing, and translating, CABOLO® allows you to visually participate to the meeting and follow the discussion through automatic subtitling in real-time.

Just a task for Cabolo!

Artificial Intelligence at your fingertips

Data protection

USB key storage system with AES-256bit encryption

Search engine

CABOLO® saves each word and timestamps them allowing you, in a few seconds, to search, review or listen any word

Multilingual

With Language Identification feature, CABOLO® optimises the transscription, automatically recognising over 24 different languages and also it is able to translate into over 60 languages

Advantages

With CABOLO® you can significantly reduce transcription time and optimise the work of your team in different departments

Tailor-made solutions

Customisable language models for all your requirements. Integration with professional audio-visual systems

Output

CABOLO® delivers documents in Word, PDF, SRT, XML, and HTML5 formats of which the HTML file, like a multimedia document, comes with point-and-click audio and text synchronisation

Compatibility

CABOLO® is compatible with any audio-video solution already available (it supports the DANTE protocol) and can be integrated with the main videoconferencing systems (SIP)

Costs

With CABOLO® immediate transcription is possible. The return on investment is between 2 - 4 months thanks to dedicated offers for any need, depending on the PRO and LITE versions
