Say hello to

cabolo®

A Cedat85 Product

The smartest, fastest, safest and most intelligent way to record, transcribe and translate any meeting.

cabolo®

A Cedat85 Product

CABOLO, the smart device you need

to simplify the transcription and translation of meetings, in several languages, with customisable vocabularies for different sectors.

An elegant device for any meeting with a powerful voice recognition system that records, transcribes, and archives safely and securely.

CABOLO is a product designed by CEDAT85, an innovative company and market leader in the development and implementation of the world's most advanced and accurate voice recognition technology solutions.

CEDAT85 has more than 35 years of experience in digital voice processing and text analysis, using the latest methodologies based on Deep Neural Network and Machine Learning.

Tailor-made solutions
Together with CABOLO, we provide customised language models tailored to the customer's needs. We also offer customised integrations with existing audio-visual systems in company meeting rooms or conference rooms.

Data protection
Our device is completely stand-alone, does not require any internet connection or technology from other providers. All transcriptions take place in real-time directly on the device and are saved on encrypted drives (internal or USB-flash).

Assistance and support
A complete platform with customised language models, support, service, and maintenance.

Multi-language
CABOLO is available in over a dozen languages: British English, American English, Italian, French, German, Spanish, North American Spanish, European and Brazilian Portuguese, Dutch, Greek, Polish, Romanian, Russian, and Chinese. A specialised team is continually working on the development of new languages and the customisation of language models by industry lexicon.

Output
CABOLO processes the recordings and produces ready-to-use output files in Word and HTML5 formats with synchronised audio and text, SRT with time stamps for subtitling and mp3.

REDUCE MINUTE TAKING COSTS BY 50% WITH CABOLO

→ ## Maximum security
Recording and transcription are also saved and protected on USB keys with AES-256 bit encryption. All data is processed and saved locally (no cloud service or no external connections)

→ ## Board function
With an intuitive interface, CABOLO allows you to automatically transcribe board meetings in real-time and keep track of agenda items discussed, votes, the sequence of speakers, add notes and comments.

→ ## Search and archive
CABOLO saves each word and 'tags' it so that you can easily search and find the information that is most important to you within seconds.

→ ## Easy to use
CABOLO is plug & play and easy to use. With its integrated microphone, it enables meetings to be recorded in unequipped rooms. At the same time CABOLO connects to any existing microphone and/or video conferencing system.

→ ## Translation
With CABOLO you can also confidently translate your meetings and documents with the most powerful, comprehensive and flexible neural machine translation technology. Supported languages for machine translation: over 60.

→ ## Compatibility
CABOLO is compatible with any audio-video solution already available (it supports the DANTE protocol) and can be integrated with the main videoconferencing systems (supports SIP).
